

Asphalt Shingle Scrap Recycling: A Bibliography of Literature and Web Sites

© Foth Infrastructure & Environment, LLC; 2011

(Sorted first in alphabetical order by primary author, then date. If no individual author is attributed, the citation is sorted by agency or publisher.)

Note: This is preliminary and is not an exhaustive bibliography. More literature references of early research exist (e.g., private company patents, etc.) but have not been recorded in this bibliography.

Abdulshafi, O., B. Kedzierski, M. Fitch, H. Mukhtar, “Evaluation of the Benefits of Adding Waste Fiberglass Roofing Shingles to Hot-Mix Asphalt.” Report No. FHWA/OH-97/006. Prepared for the Ohio Department of Transportation and the U.S. Department of Transportation, 1997.

Ali, Chan, Potyondy, Bushman, and Bergen. (1995). “Mechanistics evaluation of asphalt concrete mixtures containing reclaimed roofing materials.” *Proc., 74th Annual Meeting of Transportation Research Board*, Technical University of Nova Scotia and University of Saskatchewan, Canada.

Association of American State Highway and Transportation Officials, “Standard Specification for Stone Matrix Asphalt (SMA).” 2008. AASHTO Designation: M 325-08. (This standard was previously designated as AASHTO Provisional Standard MP 8.)

AASHTO Standard Practice for Designing Stone Matrix Asphalt (SMA) as published in 2008, AASHTO Designation: R 46 08. (This standard was previously designated as AASHTO Provisional Standard PP 41.)

Association of American State Highway and Transportation Officials, “Standard Specification for Use of Reclaimed Asphalt Shingles (RAS) as an Additive in Hot Mix Asphalt (HMA).”

Association of American State Highway and Transportation Officials, “Standard Practice for Design Considerations When Using Reclaimed Asphalt Shingles (RAS) in New Hot Mix Asphalt (HMA).” 2008. AASHTO Designation: PP 53-08.
